**RE: Results of Compliance Inspection
James Threet Farms, TN0080225**

Dear Mr. Threet:

On March 21, 2012, Division of Water Pollution Control (WPC) personnel from the Cookeville Environmental Field Office conducted a Compliance Evaluation Inspection of your Concentrated Animal Feeding Operation (CAFO) located at 2201 Livingston Highway in Fentress County.

Permit, Nutrient Management Plan (NMP), Records

The SOP permit TN0080225, nutrient management plan, and records were available and reviewed onsite. Third party transfer records do not apply to this site as all litter is applied to adjacent fields as per the Comprehensive Nutrient Management Plan (CNMP). The CNMP and litter analysis were current and the most recent annual report was available onsite.

Litter Storage / Handling / Disposal

During the inspection, cleanout was occurring and no birds were present onsite. Litter was being loaded from houses to trucks and applied to adjacent fields. The litter storage facility was less than 10% capacity and no litter was exposed to stormwater. Compost bins were well kept. The area around the litter storage, compost, and bedding storage areas were clean of contaminants.

Thank you for your attention to the requirements of the SOP permit. If you have any questions or comments, you may contact me at (931) 432-4015 or by electronic mail at rita.thompson@tn.gov.

Respectfully,

A handwritten signature in blue ink that reads "Rita Thompson". The signature is fluid and cursive, with a long horizontal flourish extending to the right.
